### SUMMARY

Results-driven software developer with 2 years of experience in designing, developing, and implementing software solutions. Proficient in multiple languages including Progress 4GL/ABL, C#, and Javascript, as well as other relevant technologies such as Jenkins, Git, and SQL. Extremely passionate about creating maintainable/well documented code and providing exceptional user experiences.

### EXPERIENCE

#### **Ever.Ag** - Software Developer

2022 - 2024

- Collaborated within a small team to maintain and enhance the functionality of our ERP system, CMS by Ever.Ag (formerly ProsoftXP)
- Daily responsibilities included using Progress 4GL/ABL to provide custom feature development for clients, as well as work on any internal enhancements and/or bug fixes that were in the ticket queue
- Developed and maintained reporting functionalities within the ERP system, including designing, generating, and updating custom reports using Crystal Reports
- Contributed to modernizing legacy components of the ERP system using C#/.NET in order to enhance the UI/UX, performance, and maintainability of our software
